

Change Log IDPA Rulebook 2017.2 to 2017.3

1/1/2018 Errata

Date	Rule Number	Change	Change
1/1/2018	8.1.7 E	Add	With respect to slide machining, SSP, ESP, CCP, CDP and BUG, Original Firearm Manufacturer (OFM) firearms with extensive slide machining are approved for use in IDPA if they meet all other requirements for their respective Divisions. For slide machining, an OFM product is defined as a complete firearm product, with specific model part numbers or SKUs catalogued as stock items by the manufacturer and have a minimum annual production of 2,000 units for that specific model. Discontinued models must have had a total production of 20,000 units for a specific model.
1/1/2018	8.2.2.3 A	Removed	Removal of material from the exterior of the slide other than front cocking serrations, tri-top, engraving, carry melts, and high power cuts.
1/1/2018	8.2.3.3 A	Removed	Removal of material from the exterior of the slide other than front cocking serrations, tri-top, engraving, carry melts, and high power cuts.
1/1/2018	8.8.4	Edit	Police and military personnel using the Duty Gear Exemption with a firearm mounted light may not activate the mounted light, and are otherwise subject to the same hand held flashlight usage rules as other competitors. See rule 3.710
1/1/2018	8.2.2.2 Z	Edit	Slide checkering, serrating, engraving, and other machining. Slides with front cocking serrations, tri-top, carry melts, and high power cuts.
1/1/2018	8.2.3.2 Z	Edit	Slide checkering, serrating, engraving, and other machining. Slides with front cocking serrations, tri-top, carry melts, and high power cuts.
